Eagle Eye Cloud VMS

Smart Video Surveillance

The image illustrates the Eagle Eye Cloud VMS system. It features a central tablet displaying a multi-camera surveillance interface with various office and parking areas. To the left, a smartphone displays an 'OBJECT COUNTING' dashboard with a bar chart showing activity levels over time. To the right, a physical white dome camera is shown, which is the hardware used for the surveillance. The background includes faint network diagrams and a white watch-like device displaying a notification for 'Loitering on camera'.

Smart, Simple, Secure Cloud Video Surveillance

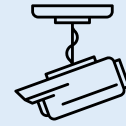

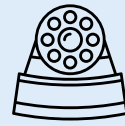

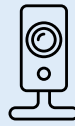

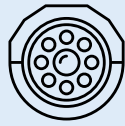

Eagle Eye Networks Cloud Video Management System delivers modern, easy-to-use cloud video surveillance paired with advanced features on the world's most flexible, open platform. With Eagle Eye Networks it's never been easier to view live or recorded video, remotely manage cameras and permissions, and use powerful artificial intelligence to drive informed business decisions and provide a secure environment.

Flexibility is what sets the Eagle Eye VMS apart from the competition. With over 10,000 compatible cameras, gone are the days of full system replacements and high upfront investments on proprietary hardware. Eagle Eye VMS seamlessly integrates with hundreds of security partners allowing customers to add Eagle Eye to their established security portfolio.

Eagle Eye's true cloud system offers the ability to manage your VMS on any device, from anywhere, plus access to AI-powered tools that make businesses more efficient by improving operations and enhancing customer service. From quickly searching and finding people and objects, to getting actionable business analytics and reducing false alarms, Eagle Eye can help.

Eagle Eye Networks is the global leader in video surveillance, helping business owners around the world improve security, operations, customer experience, and safety.

Eagle Eye Cloud VMS is the only VMS that allows businesses to choose the security camera that is best for their needs or upgrade without ripping and replacing existing infrastructure.

Why Businesses Choose Eagle Eye Networks

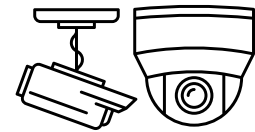

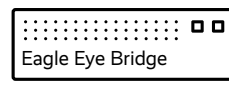

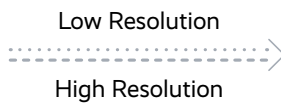

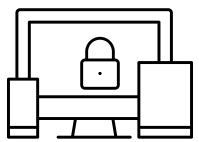

FLEXIBLE, SCALABLE SOLUTION

Traditional video security systems require substantial amounts of hardware, complicated installations and constant software maintenance and management. Eagle Eye Networks has changed that with straightforward, enterprise-grade performance that is easy to deploy, remotely manage, and seamlessly integrate with existing infrastructure and third party systems.

- Easily add new cameras and locations as your business grows
- Connect existing cameras or choose new cameras from hundreds of manufacturers
- Adjust camera retention and resolution with the click of a button
- Add features and functionality with the virtual flip of a switch
- Flexible storage options between the cloud, on-premises, or hybrid
- Flexible payment options fit any budget

INSTANT REMOTE ACCESS

See every camera and location from any computer, mobile phone, or tablet. No matter where you are or what time of day it is, you can view live video, search all video, adjust camera settings, email videos, and more.

CYBERSECURITY

The Eagle Eye Cloud VMS is built and maintained by physical and cybersecurity experts to protect confidentiality, integrity, and availability of your network and data. Eagle Eye Networks is committed to cybersecurity and has completed SOC 2 Type 2 compliance, considered the gold standard of independent security audits.

Security features include:

- Secure video encryption
- Constant monitoring against potential cyber threats
- No vulnerable open ports or onsite firewalls
- Automatic software updates
- Triple redundant storage at purpose built data centers
- Two-factor authentication

OPEN PLATFORM AND PARTNERSHIPS

Eagle Eye Networks is the leading open platform in the market making it easier to integrate video surveillance with other mission-critical business applications. From access control to point-of-sale, our RESTful API is designed for unlimited customization and secure integrations. Eagle Eye has a vast and growing network of technology partners unlocking new capabilities everyday.

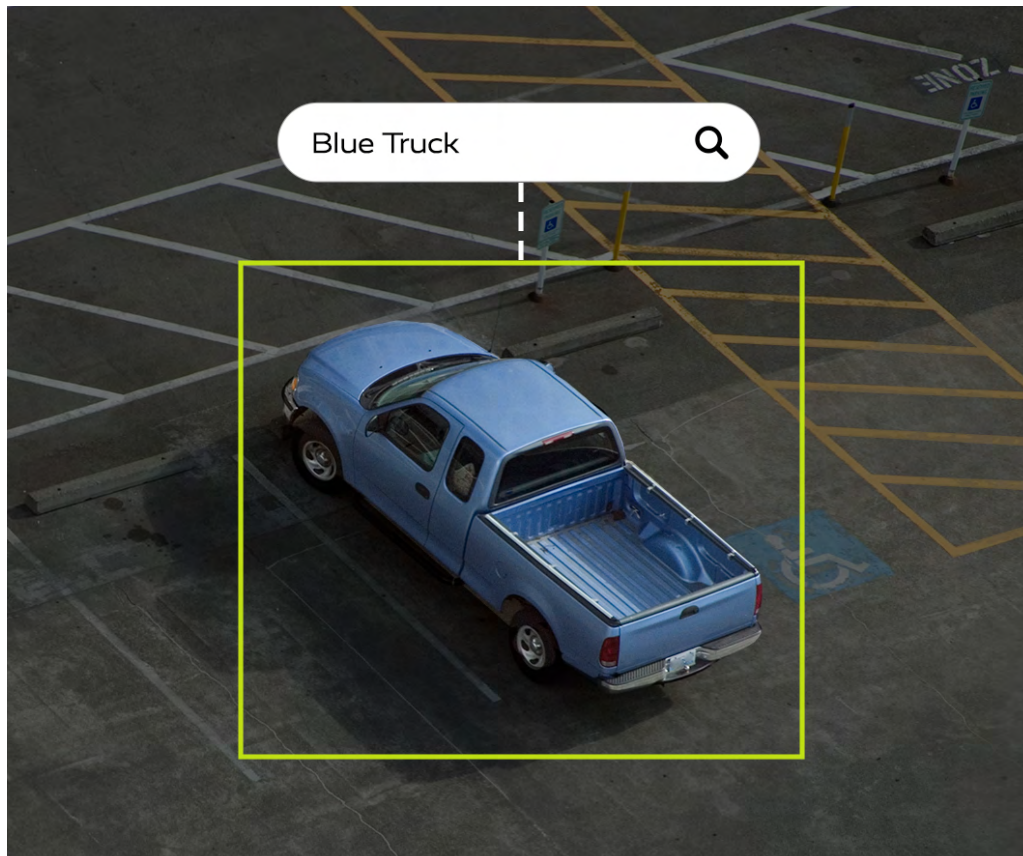

- Access Control
- AI & Analytics
- Construction
- Gun Detection
- Health Monitoring
- License Plate Recognition
- Monitoring
- Point-of-Sale
- Secure Display Station
- Building Management
- Smart Parking
- Smart Sensors
- Speakers
- Video Verification

Improve Business Operations with AI

Spend less time managing your video surveillance system and more time improving your business.

Our intuitive and powerful analytics use artificial intelligence to provide you with information you can actually act on, such as bringing to light employee training gaps, alerting of potential safety liabilities, providing necessary audit trails, and simplifying compliance reporting.

Video analytics also provide insight into employee behaviors, ensuring procedures are being properly followed, customer interactions are positive, and training is appropriate and effective.

License Plate Recognition

Eagle Eye License Plate Recognition (LPR) is an affordable, cloud-managed solution for accurate detection and recognition of license plates. Eagle Eye LPR transforms any digital camera into an AI-powered LPR camera. This is an upgraded feature to the standard VMS subscription.

Added Benefits of Eagle Eye Cloud VMS

AWARD WINNING CUSTOMER SERVICE

Providing immediate and helpful technical support is essential for Eagle Eye. That is why you can instantly reach one of our trained technicians - 24/7/365, no phone trees, automated messages, or outsourced call centers.

Eagle Eye support specialists will answer your call and work with you until your questions are answered or issues resolved.

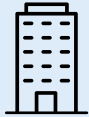

BANDWIDTH MANAGEMENT

Eagle Eye Cloud VMS will not slow down your business network. Intelligent Bandwidth Management™ dynamically adjusts transmission and bandwidth use, making sure that your video makes it to the cloud without impacting your network.

TAILORED SOLUTIONS FOR BUSINESS NEEDS

At Eagle Eye, we understand that our customers' needs are as unique as their businesses and industries. Larger organizations have more complex needs, while smaller businesses appreciate simplicity. That's why Eagle Eye Networks offers Editions, designed to simplify the ever-growing product set and better align pricing and features to the realities of different sized businesses – all with the flexibility to scale as a business grows and changes.

STANDARD

Designed for small businesses and franchisees with a modest number of locations and limited users. This basic Edition is for businesses that value remote access to surveillance video and cloud storage at a reasonable cost.

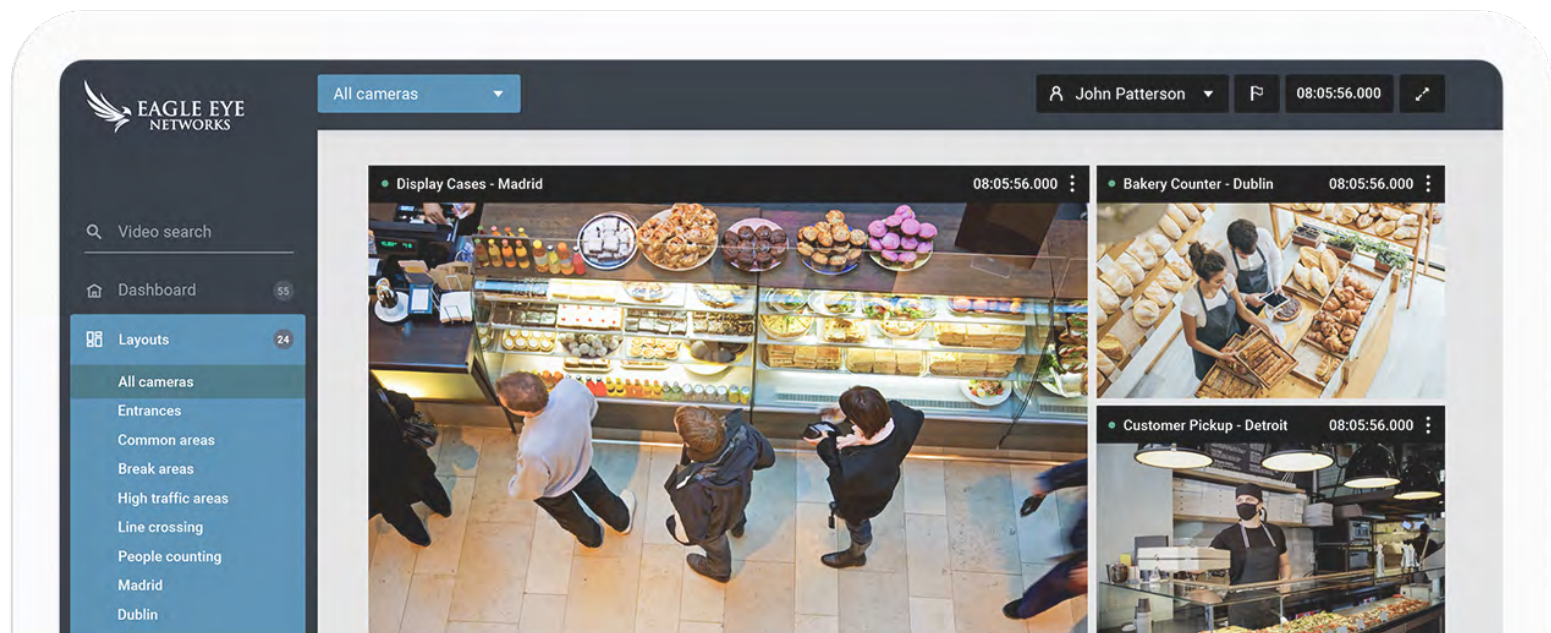

PRO

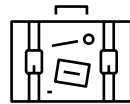

Designed for mid-sized (10 to 25+ locations) and rapidly growing business operations. The Professional Edition includes features to better manage large quantities of locations, users, and cameras.

ENTERPRISE

Ideal for large, distributed, and multinational businesses. Enterprise supports an unlimited number of users and provides a sophisticated access management solution plus advanced operational reporting to meet audit and regulatory requirements.

Customers around the globe in virtually every industry trust Eagle Eye Networks for actionable business intelligence and security.
