Remote Access & Support

Handle all your IT issues with GoTo.

Ensure your team is ready to handle anything and everything, from routine IT management to complex problem-solving, with GoTo's remote management, access, and support solutions.

GoTo Resolve

Resolve empowers IT teams and MSPs to simplify and streamline their operations. Tackle support issues from start to finish, from logging a problem discussed in MS Teams to remotely resolving the issue, all in one platform. Free and paid account options available.

- Modern, device background access and automation, backed with Zero Trust security
- Desktop, mobile, and camera-streaming remote access & support
- Lightweight ticketing with messaging integrations
- Remote monitoring and management capabilities

Rescue

With powerful remote support features, advanced security capabilities, and ample customization options, Rescue is best for teams at large businesses and enterprises to provide technical support to employees and customers.

- Break-fix desktop and mobile remote support
- Customizable connection methods and branding
- Advanced account administration and agent monitoring
- Built-in integrations and open APIs

Central

Internal IT, MSPs, and hardware (kiosks, POS systems, digital signage) support teams rely on Central to remotely monitor and manage IT infrastructure, secure endpoints, automate task management, and gain better visibility into their IT universe.

- End-to-end monitoring and proactive alerting
- Integrated antivirus software and antivirus management
- IT automation and patch management
- Employee (non-IT) device access permissions
